The systemic nature of the debt crisis on humanity, stability and ecology and update Debt Sustainability Frameworks to ensure debt restructuring are faster and preserve fiscal space for climate and development action.

Invest

In women’s economic power, acknowledge the value of unpaid care, and publish gender disaggregated data to help countries心里 sustainable.

Expand

The Resilience and Sustainability Trust to include countries without an IMF program and to fund pandemic preparedness.

Improve

Article IV reviews to support borrowing countries in aligning economic and social development with climate objectives, accounting for countries’ natural capital.

Stop

Promoting climate policies that are not aligned with equitable development, and instead promote inclusive green development.

Provide

Countries in the Global South a real and meaningful voice in IMF decision making through ambitious quota realignment.

Innovate

With governments to re-channel Special Drawing Rights (SDR) and approve their use to expand the balance sheets of Multilateral Development Banks.

Champion

A new SDR General Allocation to support development, the energy transition and climate adaptation.

Develop

Proposals to incentivize shared prosperity and facilitate access to affordable financing for vulnerable countries, particularly those that are fragile and affected by conflict.

Lead

The creation of new debt instruments and mechanisms that allow countries to reduce the cost of capital and resolve solvency challenges.
